

LASER CUTTING

Metfab's Prima Platino 3500 watt laser cutting machine.

This machine is capable of cutting up to 3/4" steel, 1/2" stainless steel and 3/8" aluminum. Our Platino laser is capable of cutting to very tight tolerances, as close as ± 0.001 ", depending on the material. The high speed and repeatability of this laser make it ideal for high production runs of intricate parts.

Specs:

Axis strokes: X - 120", Y - 60", Z - 6"

CO2 laser power: 3500 watts

Accuracy: ± 0.001 "
